

OBJECTIVE

Artificial Intelligence and Data Science graduate with a strong foundation in software development, machine learning, and data-driven problem solving. Skilled in Python, Django, React, SQL, and ML fundamentals, with experience developing full-stack applications and backend systems. Seeking opportunities in Software Engineering, Machine Learning, and MLOps to build scalable and impactful technology solutions.

EDUCATION

|                                                          |                            |
|----------------------------------------------------------|----------------------------|
| KIT - Kalaigarkarunanidhi Institute of Technology.       | Coimbatore, TamilNadu      |
| B.Tech in Artificial Intelligence and Data Science.      | CGPA 8.10 <b>2022-2026</b> |
| Isha Vidhya Matriculation Higher Secondary School: HSC.  | Coimbatore, TamilNadu      |
| Isha Vidhya Matriculation Higher Secondary School: SSLC. | Coimbatore, TamilNadu      |

SKILLS SUMMARY

- Technical Skills: Python, C, SQL.
- Platforms: Linux, Jupyter Notebook, Visual Studio Code, Excel.
- Backend: Django, Django REST Framework (DRF), REST APIs, JWT Authentication.
- Frontend: React.js, HTML5, CSS3.
- Database: PostgreSQL, MySQL.
- DevOps: Docker, Render, Git, GitHub, CI/CD.
- Machine Learning: NumPy, Pandas, Scikit-learn, Machine Learning Fundamentals.
- Personal Traits: Adaptability, Communication, Team Collaboration.
- Languages: Tamil, English, Telugu.
- Passions: Competitive Coding, Problem Solving, Open Source Contribution, Machine Learning.

WORK EXPERIENCE

|                                                                                                                                                                                                                                                                                                                                      |                                      |
|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| <b>Full Stack Engineer   Codingmart Technologies</b>                                                                                                                                                                                                                                                                                 | <b>Jan 27, 2026 - May 25, 2026</b>   |
| <ul style="list-style-type: none"><li>o Designed and developed scalable web application features across both frontend and backend systems using modern development frameworks.</li><li>o Built and integrated RESTful APIs, performed debugging, and contributed to application performance and reliability improvements.</li></ul>  |                                      |
| <b>Cybersecurity Intern   Coimbatore Cyber Crime Police Station</b>                                                                                                                                                                                                                                                                  | <b>July 15, 2024 - July 29, 2024</b> |
| <ul style="list-style-type: none"><li>o Gained hands-on experience in real-time cyber threat analysis of 20+ cases.</li><li>o Analyzed 15+ real-world cybercrime cases, identifying attack patterns and vulnerabilities. Acquired hands-on experience with cybersecurity tools for threat detection and digital forensics.</li></ul> |                                      |
